Third Party Verification Report

Scope of Verification

BSI Korea has verified the environmental achievements and the product development described in Kia Environmental & Social Report 2005. The section on greenhouse gases was excluded because it requires additional verification procedures and methods. Kia Motors is held accountable for colleting and reporting all information in the report. The expression "verification" indicates to review and confirm the information in the report and provide opinions about it. The report was generated based on data from three Kia Motors offices in the Sohari Plant, the Hawasung Plant, and the Kwangju Plant and Environmental Technology Research Center. As this verification report is for the use of management, we hereby clarify that we are not responsible for indemnifying any kind of cost, loss, damage or liabilities incurred by third-party use of this verification report.

Criteria & Procedures

BSI Korea verified the safety, accuracy and consistency of the report through documents and on-site review. We compared data submitted by each site with the report and visited the Hwasung Plant to check real environmental achievement and management.

Limits of Verification

Verification was carried out on sample data submitted by sites. In other words, verification is based on neither all the data collected at each site nor actual calculation. As we visited only one out of four sites including the Environmental Technology Research Center, there may be unnoticed inconsistencies or errors.

Conclusion

Despite the aforementioned limits, the verification team confirmed that the information in the Kia Environmental and Social Reports 2005 were based on truth. Inconsistencies and errors detected during verification were properly adjusted and reflected in the verification report.

Verification Staff

Environmental Management System ISO 14001 researchers, Ahn Sang-ho, Yoo Sang-geun and Yang In-mok took part in the verification. They have experience in the automobile industry and report verification but have no interest in or relationship with BSI Korea.

BSI KOREA

Questionnaire

on Kia 2005 Environmental & Social Report

In its Environmental & Social Report 2005, Kia Motors has attempted to disclose its successes in environmental, social and economic endeavors.
Your valuable opinions will be used to improve the Environmental & Social Report 2006.

Q1

Overall evaluation of the report:
☐ Good ☐ Fair ☐ Poor

Comprehensibility:
☐ Easy to understand ☐ Fair ☐ Difficult to understand

Amount of information in the report:
☐ Too much ☐ Adequate ☐ Not enough

What is good about the report?
☐ Editing and layout ☐ Sophistication of information ☐ Available data ☐ Design

Q2

What are your areas of interest? (Check more than one if applicable.)
☐ Environmental history ☐ Greetings from CEO ☐ Environmental Declaration
☐ Environmental policies ☐ Policies on environmental activities
☐ Environmental management strategies and sustainability goals
☐ Economic results ☐ Environmental vehicles of future
☐ Environmental products ☐ Environmental management system
☐ Green purchasing system ☐ Legal compliance ☐ Efficient use of resources
☐ Reduction in environmentally hazardous material emission
☐ Environmental impact evaluation ☐ Clean production technology
☐ Environmentally friendly service system ☐ BASIC movement ☐ Employee relations
☐ Supplier relations ☐ Customer relations ☐ Relations with the local community

Can you give us specific reasons for your interests in those areas?
( )

Q3

What are some areas we can improve on? (Refer to Question 2.)

Area	Reason	Area	Reason

Q4

What would you like to see in KIA Environmental & Social Report?

Q5

Please tell us what we can do for environmental preservation and sustainable development.

Thank you very much for answering the questionnaire.

Please send your completed questionnaire to us via Fax (82-2-3464-6734) or e-mail (ecoKIA@kia.co.kr).
