

Flint

The flint in a lighter is the key component that creates a spark.

When the flint wears out, it will not spark properly and needs to be replaced.

Movement that inspires

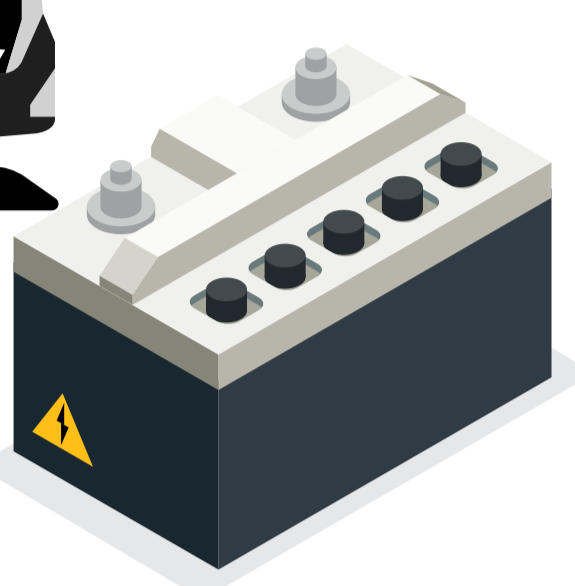

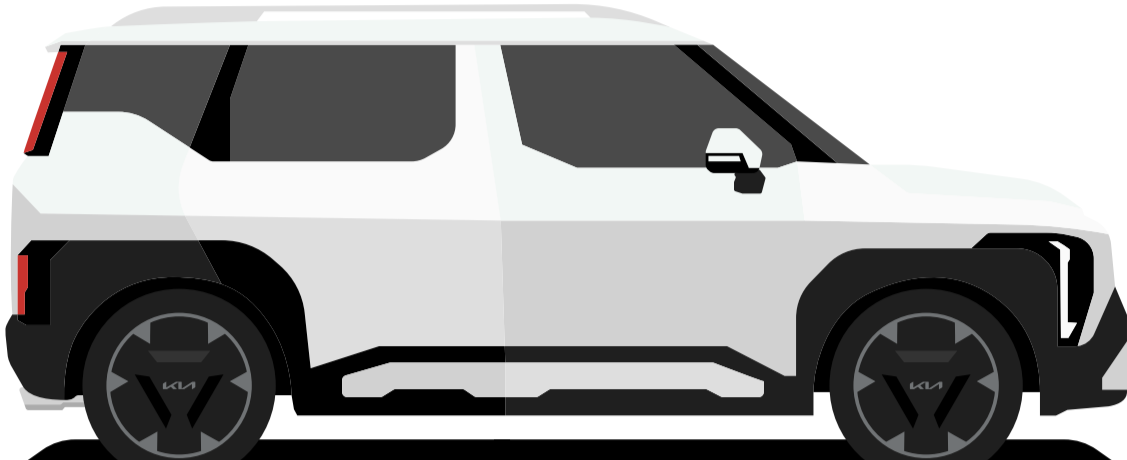

Flint

The flint in a lighter is the key component that creates a spark.

When the flint wears out, it will not spark properly and needs to be replaced.

The battery is the equivalent of a flint in a vehicle

A battery also needs to be replaced when it reaches the end of its life.

The battery supplies the power to start the vehicle and operate electrical devices

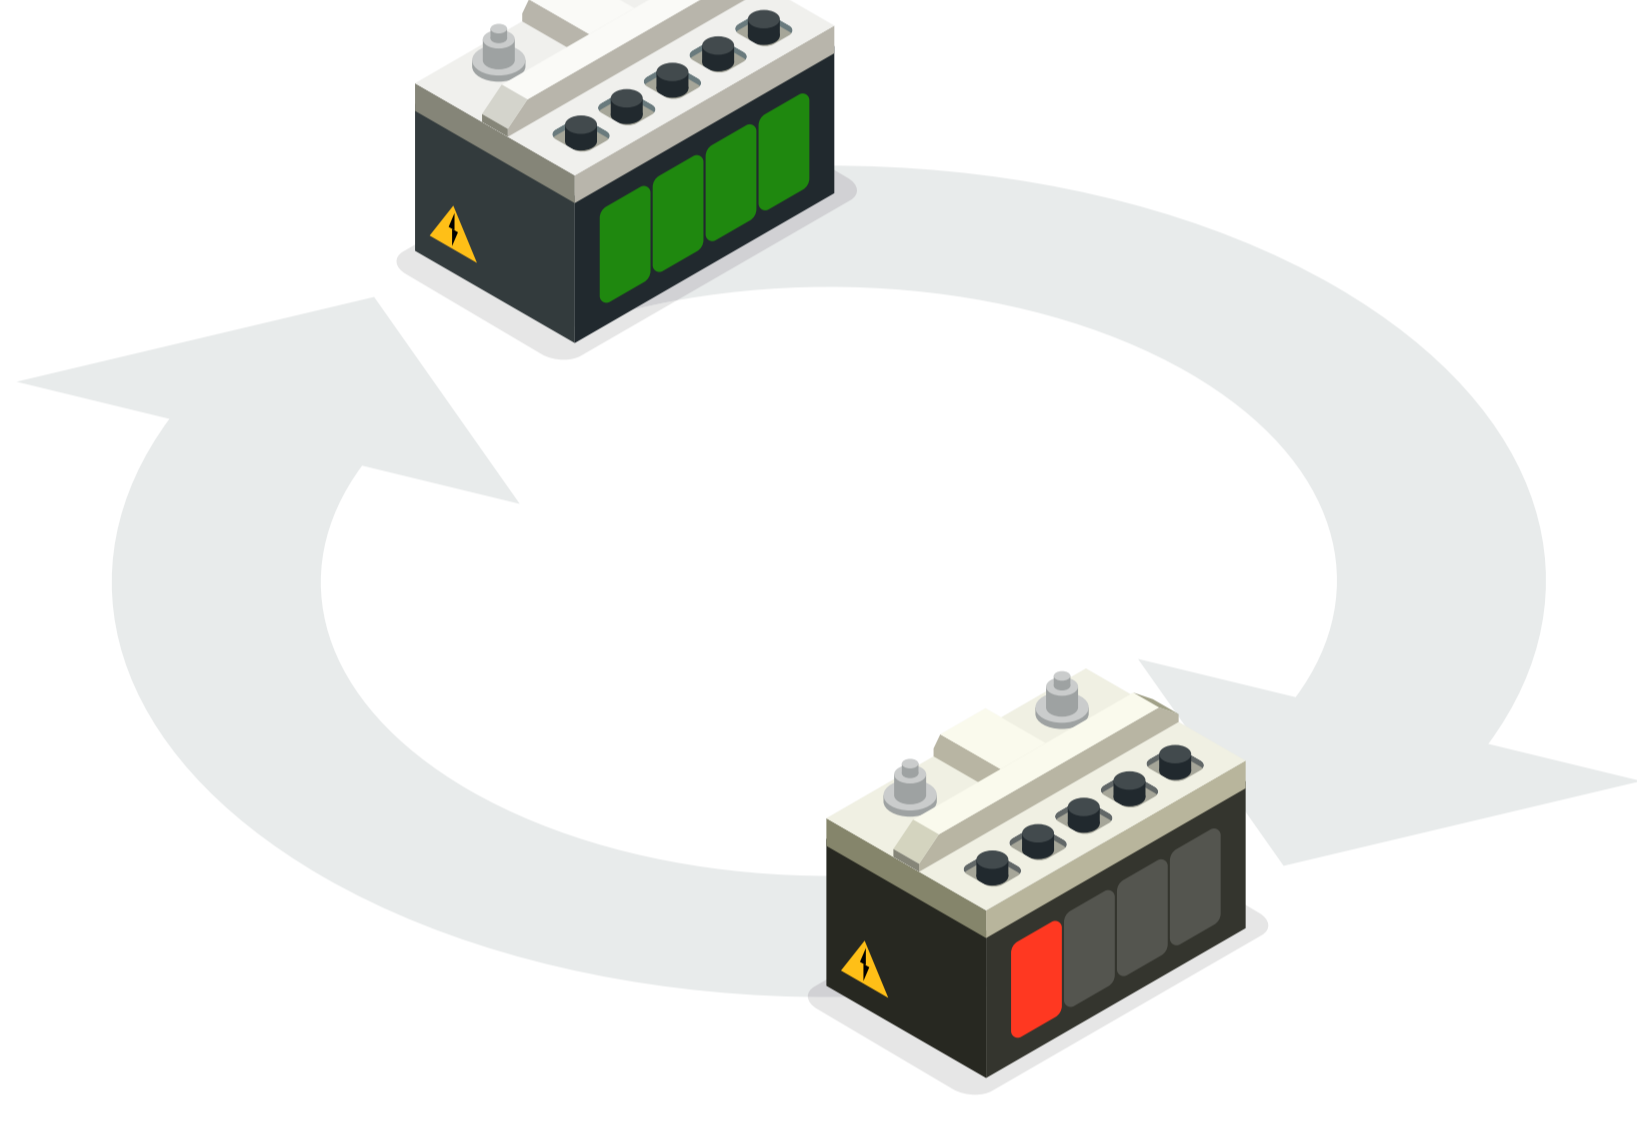

.....

.....

Battery maintenance can affect a vehicle's performance.

Vehicles typically use MF (Maintenance Free) and AGM (Absorbant Glass Mat) batteries.

MF batteries do not require any maintenance or repairs and can be replaced at the end of their life.

How to extend the life of your battery

Drive your vehicle regularly (A minimum of 10 minutes at least once a week)

Park indoors when temperatures are low

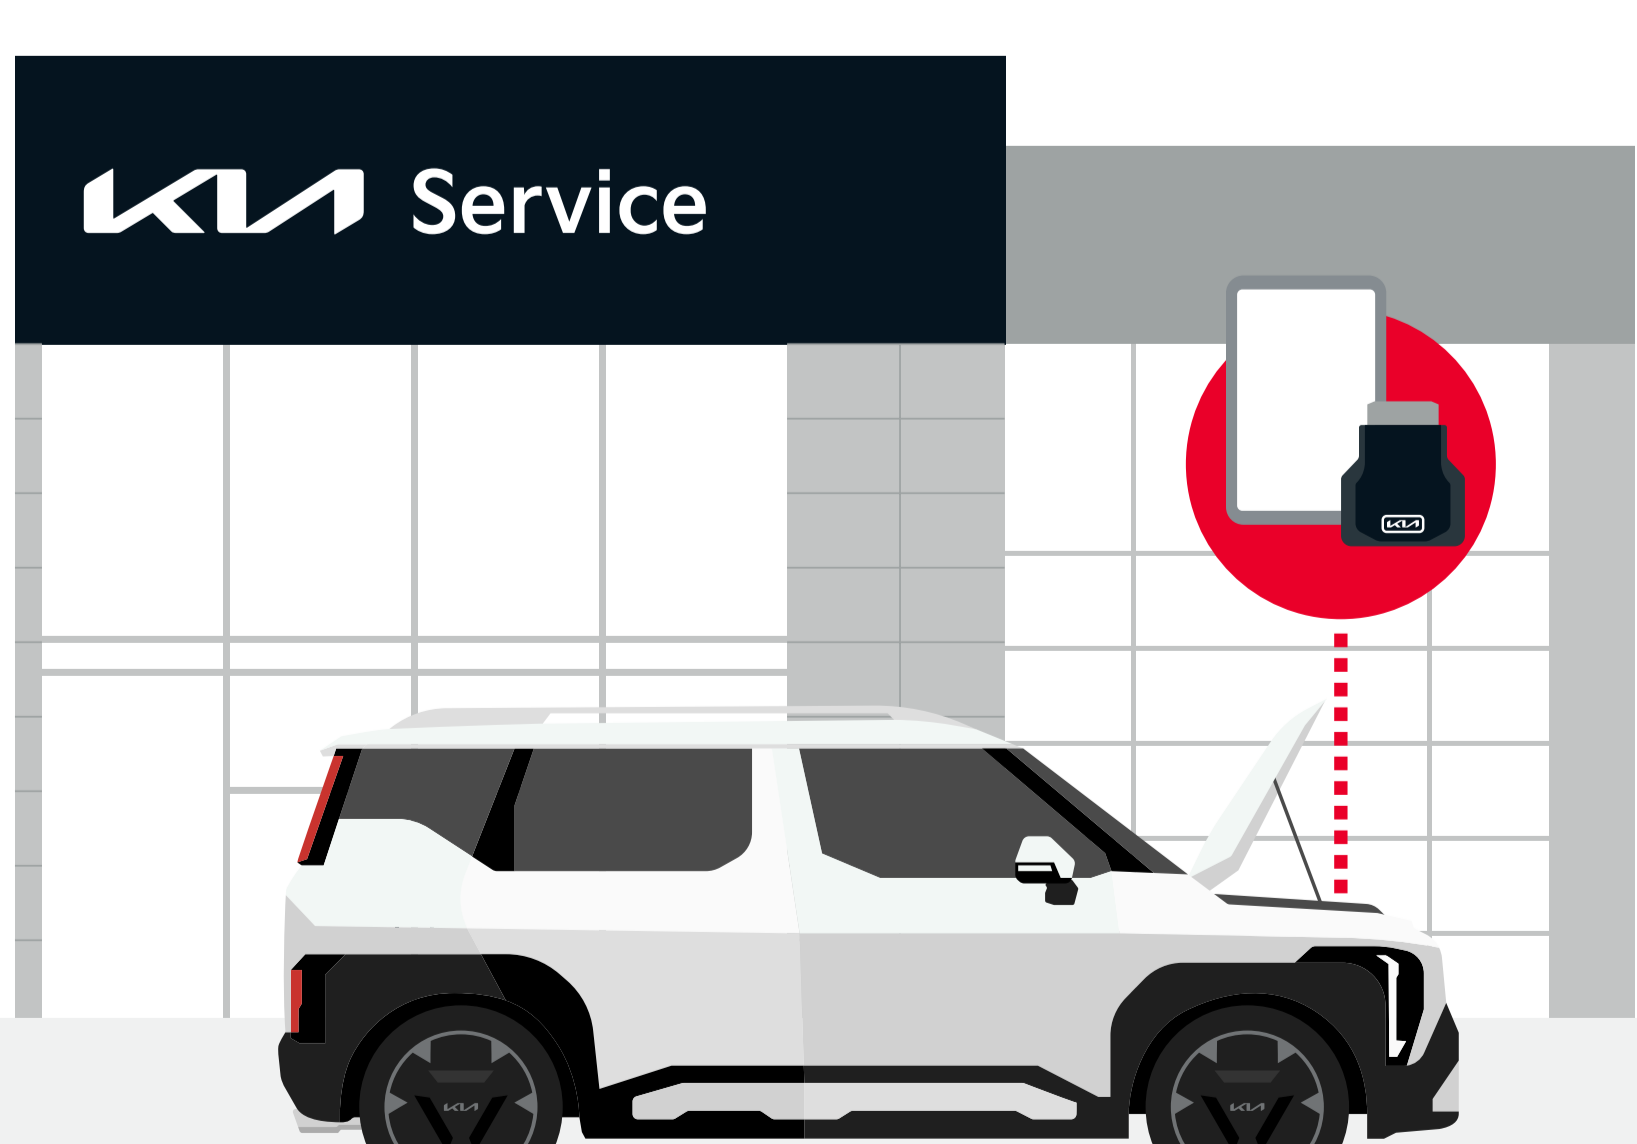

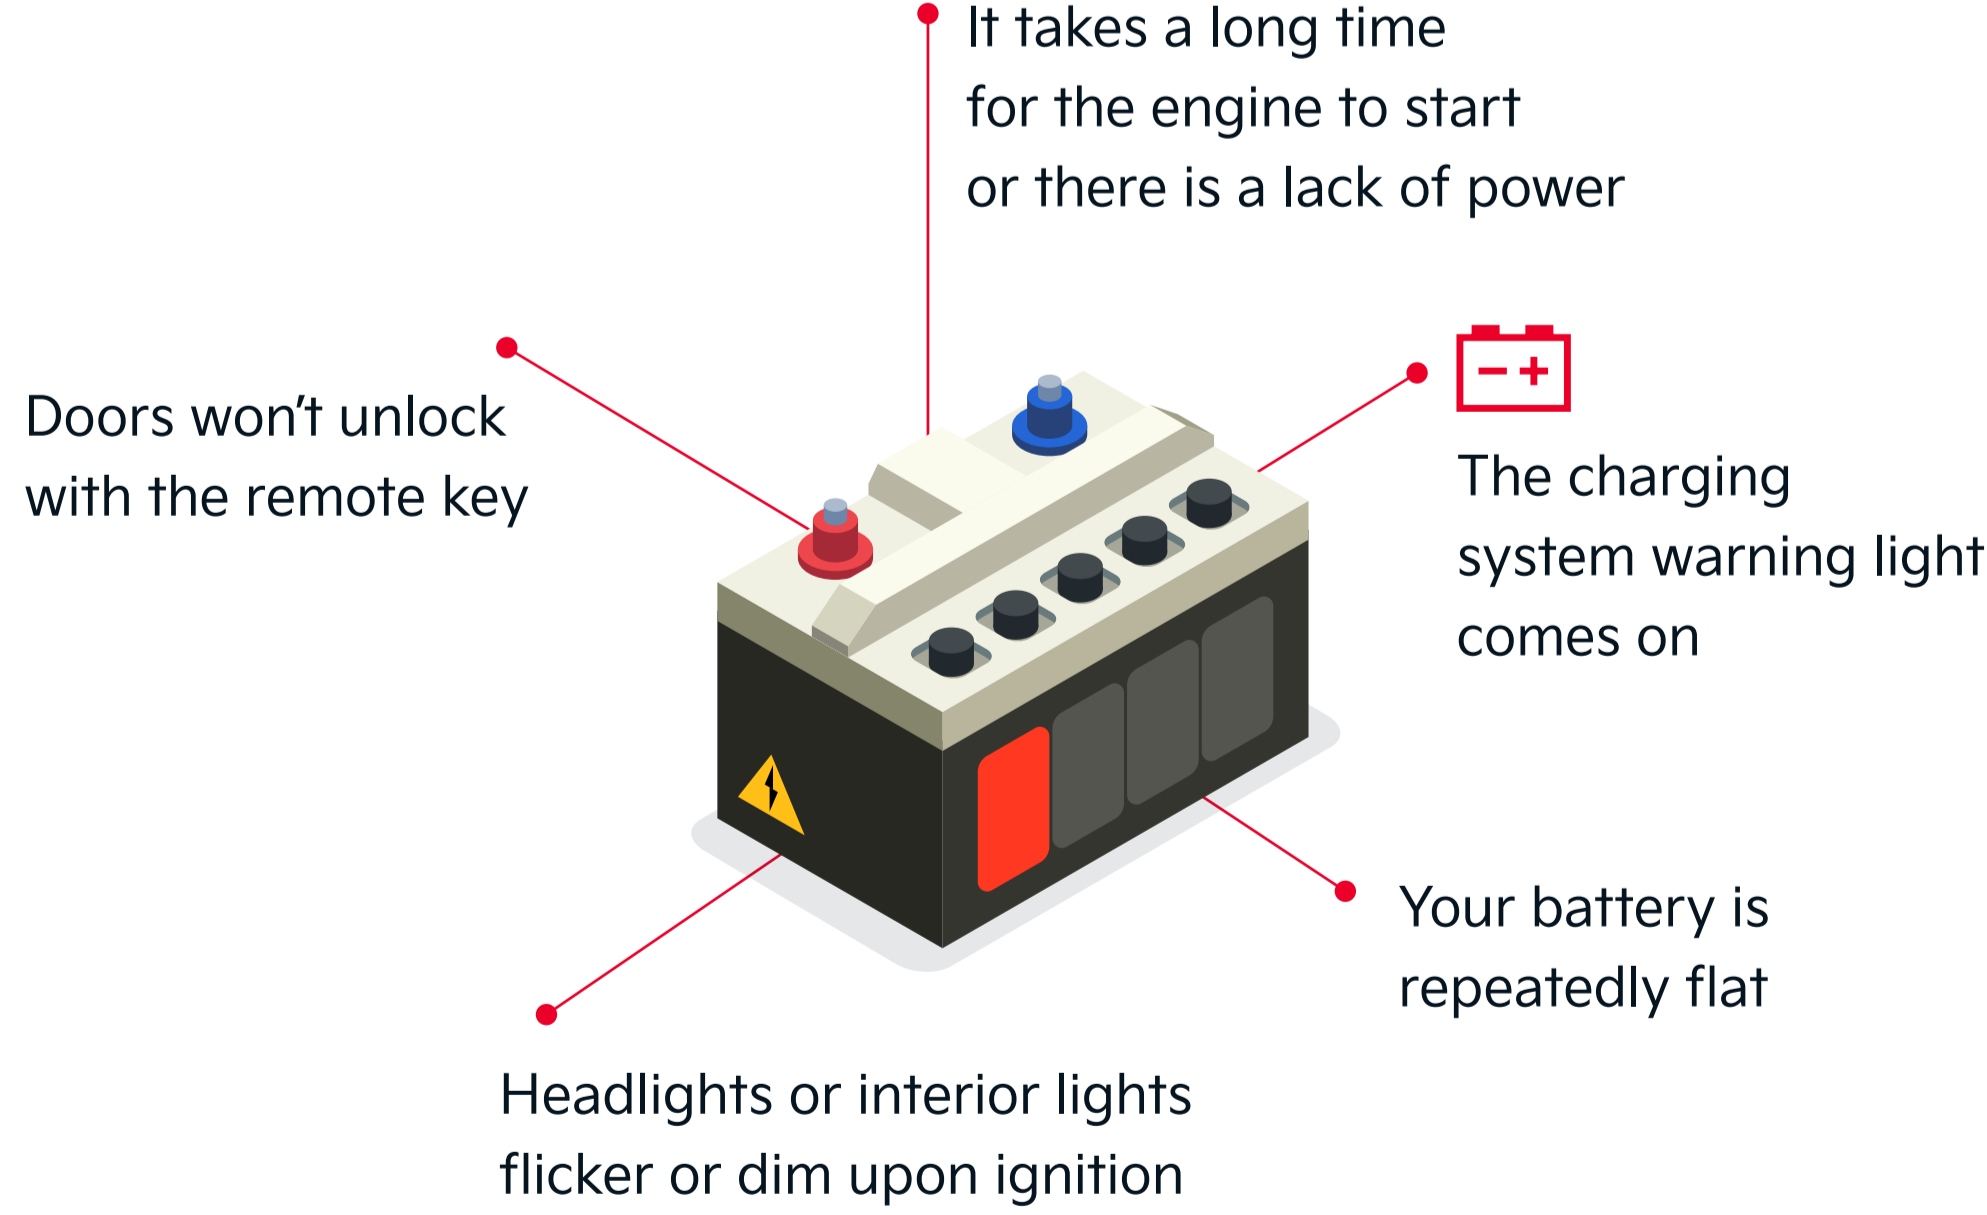

ACC / ON

Refrain from using electrical devices for extended periods of time in ACC/ON mode

OFF

Disable constant power supply to dash cam

Signs your battery is reaching the end of its life

You can also check your battery's condition using professional diagnostic equipment.

Visit a Kia Dealer and check the *SOC/SOH with a diagnostic device.

You can determine when it's time to replace your battery.

* SOH (State of Health): Remaining battery life
SOC (State of Charge): Remaining battery charge

The criteria and details may differ depending on the options and specifications of each individual vehicle, and may vary according to regional regulations, driving conditions, the actual condition of the vehicle, and external factors. The company shall not be held legally responsible for any injuries, damage, or other issues resulting from user negligence or improper handling while operating or inspecting the vehicle in accordance with CardNews.
