## Razor blades get dull when used for a long time

Wiper blades also wear out and deteriorate in performance over time.

## If your windscreen is not cleaning properly, your windscreen or wiper blades may be contaminated

Clean your windscreen and blades with cleaner or neutral detergent and rinse with clean water.

## If the wiper blades aren't effective even after cleaning,

there is a good chance that they are worn or cracked. If this is the case, you should change them.

## How to Care for Your Wiper Blades

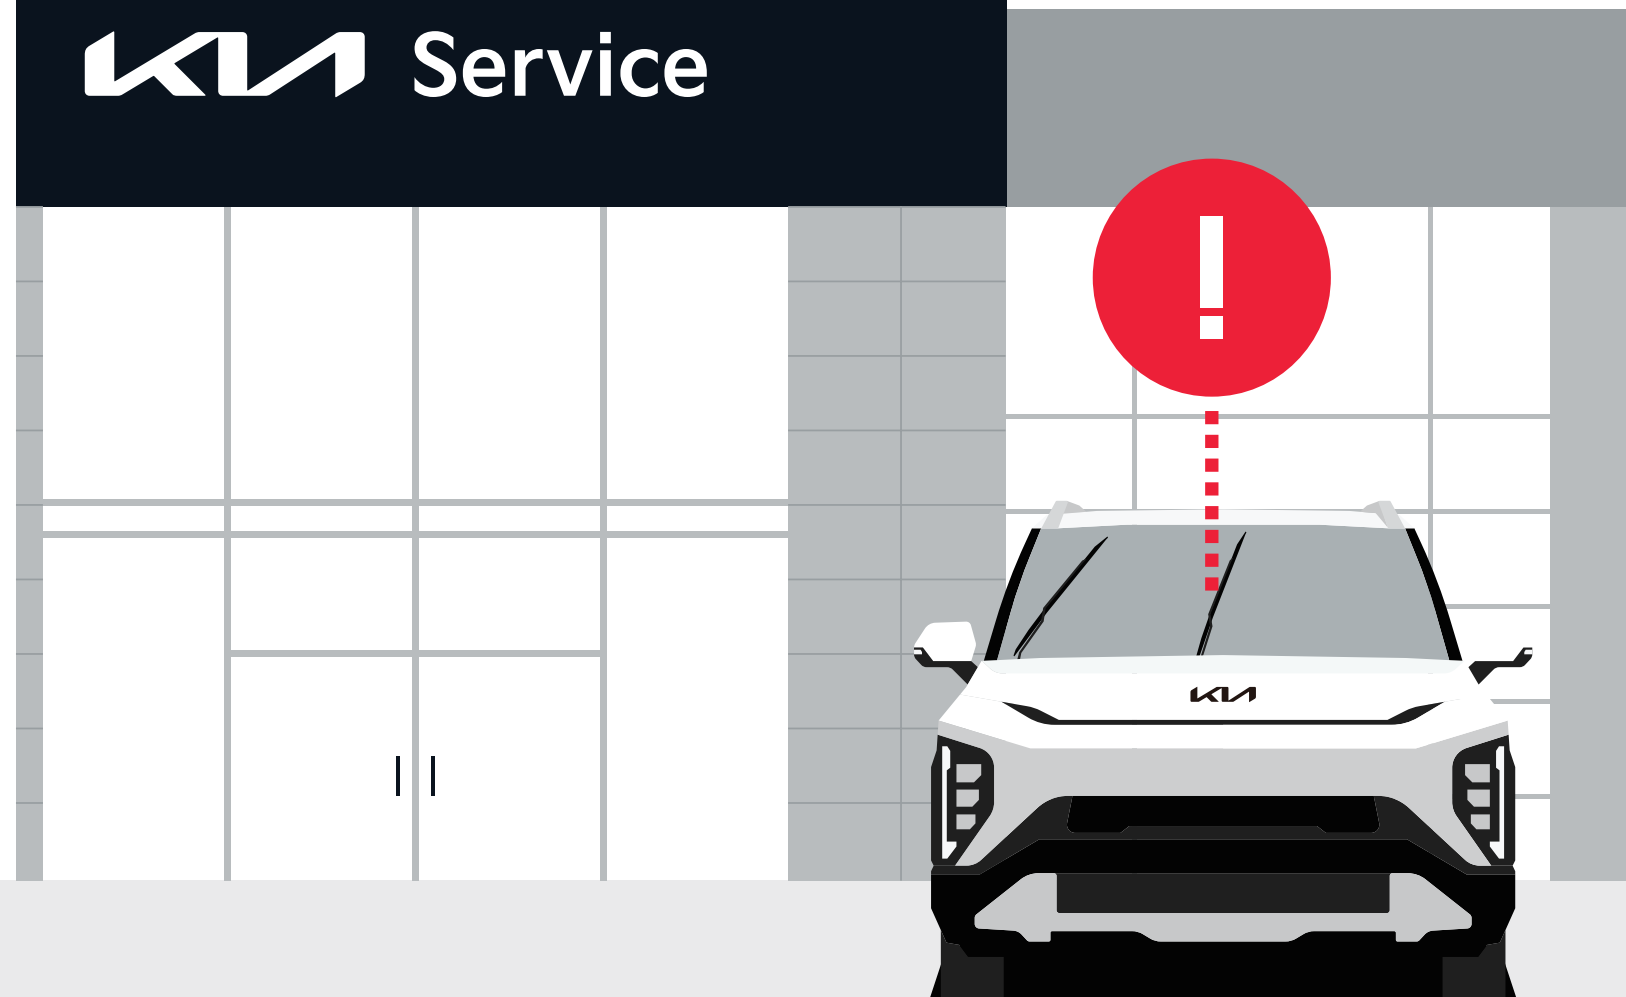

Refrain from moving wipers manually  
(Danger of damage)

Use the correct blades for your model  
(Prevent malfunction)

## Kia Service

If you are having difficulty replacing it by yourself or wish to avoid causing damage to the wiper arm or parts, please visit a Kia dealer for replacement.
