

Power Seat Module Update

EV9 GT-Line | 14/02/2024

Dear Owners,

An OTA Update for the Power Seat Module (PSM) will be available from the 14th of February 2024. This update is only applicable to EV9 GT-Line variants with the leg rest function.

What's New

This OTA update provides the following improvements to the driver's seat:

1. To enhance comfort, we have optimised accessibility when entering or exiting the vehicle by extending the movable range of the driver's seat easy access position. If the seat memory is configured and driver's door is opened, the seat may automatically move back even further, offering additional space.
2. In the interest of safety, we've improved the logic for adjusting the driver's seat leg rest. While the vehicle is in D (Drive) the leg rest can only be lowered. If you would like to raise the leg rest, this action can only be carried out while in P (Park).

We hope that this OTA update will enhance your driving experience with added convenience and comfort.
