Movement that inspires

The Kia EV6

Movement that inspires

Inspiring every journey.
The Kia EV6

From its distinctive exterior and innovative interior space design to its intuitive advanced technologies, the Kia EV6 is created to inspire you on every journey.

Movement that inspires.

Every space that surrounds you is a source of inspiration.

Interior space design is not just about building a bigger cabin space. It's about designing the most user-centric and immersive experience through design and intuitive technologies.
The interior of the Kia EV6, created to be your own personal inspiration room.

At Kia, we call this space innovation.

More time for you to bring your ideas to life.

The Kia EV6 also creates more time for you to bring your ideas to life. In just 4.5 minutes you can charge up to 100km.
It also takes less than 18 minutes to charge from 10 to 80%. Ultra fast charging means you have more time to spend on things that matter to you most. Like coming up with your next big idea.

E-GMP
A new EV platform

The Kia EV6 is Kia's first EV built on the Electric-Global Modular Platform (E-GMP). Ultra fast charging. Long range. Spacious interior. Zero emissions. All this is made possible through the new E-GMP platform. With the new platform we are taking EVs to the next level.

The Kia EV6. Only the first of many more great things to come.

The most inspiring thing we can create is an emotion.

The journey is not just about getting from one location to another. It's about creating an experience, an emotion that inspires you to create ideas. The Kia EV6 is created to deliver not only comfort, style and utility, but also an emotion.

A new standard for sustainable mobility.

Zero emissions is only the beginning. From vegan leather and recycled PET materials used in the interior to its innovative technologies that intuitively guide and protect you.

The Kia EV6 sets a new standard for sustainable mobility.

Every story starts on a fresh piece of paper.

When you're inside the Kia EV6, it's a totally different feeling. There's plenty of cabin space that allows for more breathing room while the instrumentation is more contained. The windows seem to start lower and reach higher. So you feel more aware and connected to the world around you.

Less searching and more discovering.

Let our technology handle the details. So you can stay more connected to the journey. By prioritizing information, the Kia EV6 lets you take in more of the world outside, and spend less time scanning screens and dials. Information is presented through clean, compact digital displays, and can even be projected onto the windshield.

Augmented Reality Head Up Display (AR-HUD)
You can get turn-by-turn (TBT) navigation directions and lane safety information as you watch the road and vehicles ahead of you. AR-HUD projects a floating image as you look out the windshield. Icons and text appear below and beside your line of vision, so a quick glance will tell you what you need to know.

An immersive journey for everyone.

The display curves gently around the driver to create the ultimate immersive experience for the driver. But the passengers feel every bit as welcomed in the Kia EV6. The sound system is designed to bring an immersive hi-fi listening experience to every seat. And for those who miss the revving of engines, Active Sound Design (ASD) simulates vrooms at different RPMs and vehicle speeds. Last but not least, there is no lack of charging ports. So everyone has a place to charge their devices.

It's like multiple inspiration rooms all fit into one.

Wireless charging tray
The charging pad in the front center console bin lets you charge compatible portable phones wirelessly. It operates with up to 15W of power, so charging is reassuringly fast.

Panoramic curved display
The Kia EV6'S intergrated curved display is not only beautiful but offers a truly immersive experience. Its wide and expansive design provides clear, unobstructed visibility.

Meridian premium sound system
Meridian, a premier UK audio brand, developed the 14-speaker system especially for the unique acoustics of the Kia EV6. A powerful external amplifier boosts output. Intelli Q quality correction adjusts for vehicle speed, and the Horizon system optimizes playback surround and image control.

USB ports on seatbacks
Convenience is important for everyone on board. Rear seat passengers will find USB ports in the seatbacks ahead of them, so they can charge or connect their devices whenever they want.

Infotainment/climate switchable controller
The shared keyboard for infotainment and climate functions uses LCD softkeys rather than actual buttons. Press the one-touch infotainment (arrow) icon or climate (fan) icon, and new icons will appear to the right with control options for the selected system.

Relaxation as a design objective.

With a flat floor and a broad shouldered frame, the Kia EV6 gave our designers more freedom to create the best design for you. The seats take up less space, but deliver more. The zero gravity Relaxation comfort seats provide a wide range of settings so that your body is in its most comfortable position, minimizing fatigue or discomfort you may have experienced with conventional seats, especially on long drives.

The Kia EV6 gives you more space and more comfort. Because when you are more relaxed, ideas flow better.

Relaxation comfort seats
The front seats are both slimmer and stronger than those found in other vehicles. They also offer more adjustability. While you charge the Kia EV6, the relaxion comfort seats let you recline to a nearly horizontal position. Through a wide range of settings, the seat is designed to relieve pressure on your hips and lower back.

2nd-row seat comfort
The slim front seats and flat floor give rear passengers more legroom. There are headrests at every position, and a center armrest incorporates a storage box with sliding cupholder and cover sections. Air vents on the B-pillars offer refreshing airflow.

Ventilated and heated front seats
Available ventilated front seats give the driver and front passenger a more comfortable ride when the weather is warm or humid. Control the fans using the console touch buttons.

Cargo space
as big as your ideas.

When you're starting from scratch on a new platform, the possibilities are endless. Especially when it comes to cargo storage. The Kia EV6 lets you store items in places you never imagined. Under the front hood, under the rear cargo floor, under the cargo screen and even in spaces between and under the seats. But in case you need to accommodate even bigger items, the rear seats also fold. Because ideas come in a wide range of sizes.

Console tray
The center console includes an armrest, cupholders, a wireless charging pad above, and an open tray below that can hold shoes, tablets, or handbags.

Front storage trunk (20ℓ, 52ℓ)
Extra space is a useful benefit of the new Kia EV6 platform. That includes a convenient storage space under the front hood. It holds up to 10kg or 20ℓ on AWD models and up to 25kg or 52ℓ on 2WD models.

Smart power tailgate
The power tailgate can be set to open to a desired height using the vehicle settings controls. Each of two drivers can program a desired stopping height for their digital key. Stand behind the parked Kia EV6 for 3 seconds with Open selected, and the tailgate will open automatically.

Remote 2nd-row seatback folding
Pull the remote release lever on the wall of the cargo space to fold the rear seatback down, creating 1300ℓ of storage capacity. With the lever's convenient location, it's like having an extra pair of hands when you need to load long or bulky items.

Reinventing how we charge.

The Kia EV6 multi-charging system operates with both 400V and 800V chargers without the need for an additional adapter. And unlike previous EVs, which only accept one-way charging, the Kia EV6 becomes your portable energy source anywhere you are. So you can power any electric item you need for any inspirational journey.

In addition, the heat pump system recaptures heat waste from the motor and other electric components to reduce winter range loss by almost 20%.

Electric-Global Modular Platform (E-GMP)
The Kia EV6 is the first vehicle based on the Kia E-GMP platform. The new long-wheelbase platform is a clean slate. It introduces a flat floor, facilitating new comfort and utility choices. Its modularization permits more flexible development to secure performance, maintenance, and safety objectives. Performance benefits include greater power, driving range, and control, as well as shorter charging times.

Charging port
The charging port door opens and shuts electronically. Just press the door itself, or the button at the left of the dash controls. You can also use a smartphone or voice command. Inside the cover, a bar graph displays the charging level.

Vehicle-to-load (V2L)
Get 220V of A/C current to power your devices, inside or outside the Kia EV6. Fully charged, its vehicle-to-load feature offers 3.6kW of power, enough to run a big-screen TV and a medium-size air conditioner for 24 hours. Inside the Kia EV6, just select EV Ready or Utility mode and use the outlet at the base of the rear seat. Outside, simply attach the V2L connector to the charging outlet.

In control of your charge status.

Time, distance and charging. These are constant concerns when it comes to an EV. This is why the Kia EV6 puts everything into perspective, so you are in control.
The driver EV interface on the left cluster screen gives you real time updates and options with simple icons. Letting you know that everything is in order. So you can enjoy the ride without worrying about your next battery charge.

Shift By Wire (SBW)
All you need to do to change gears between Reverse, Neutral, and Drive is brake and turn the dial of the Shift-by-Wire system left or right. The P button puts the Kia EV6 in Park. New paddle shifters with minus and plus signs highlight the simplicity of the system.

Smart regenerative braking system (SRS 2.0)
When you coast, you can recharge the vehicle. To activate SRS 2.0 pull the right paddle switch. It adjusts the level of regenerative coasting based not only on navigation data, but on radar data as well. So if the distance or speed of the car ahead changes, SRS can adjust the level in real time. An arrow icon on the cluster stretches to show the level of regeneration.

Drive Mode Select (DMS)
The Kia EV6 can adjust to the way you like to drive. Choose Normal, Sport or Eco drive mode using steering wheel or voice controls. Sport lets you accelerate more quickly, while Eco saves energy to extend your driving range. Each mode has a theme display on the cluster screen that switches from white to black at night.

Space innovation.

Soft, durable suede. Or vegan leather. Recycled materials. The Kia EV6 is ergonomically designed for your body's comfort, but also for your peace of mind. Eco-friendly and sustainable. It's not just about style. This is a new way of being.
