Niro EV	17	Michelin	215/55R17	C	A	W2	68
Venga	15	Continental	195/65R15	E	B	W2	71

¹⁾ Fuel Efficiency Grade

Tyres with low rolling resistance save fuel and cut CO2 emissions. A-Grade tyres deliver the best fuel efficiency, with each subsequent grade through to G signalling an increase in fuel consumption.

²⁾ Wet Grip Grade

Grip in wet conditions is a key for safe driving. Performance of the tyre in the wet is graded from A (best grip) to G (worst grip).

³⁾ External Rolling Noise Grade

This is the external noise made by the tyre and is measured in decibels. The more waves shown on the label, the louder the tyres.
