

The new Seltos

Movement that inspires

Technology. For humans. The new Kia Seltos

Reborn with a bold, dynamic design.
Get behind the wheel of the new Kia Seltos
and experience a new breed of SUV.

A prominent grille and lighting arrangement, complemented by a futuristic wheel design, give the new Seltos a powerful presence on the road, front and back.

An intuitive, high-tech interior space.

Horizontal design elements emphasize width and spaciousness. Displays and controls are optimally placed for high visibility and easy reach. A digital key, Wi-Fi, wireless charging, and mobile-paired audio keep the user seamlessly connected with modern life yet prepared for the future.

Width and depth are the focus of the new Seltos interior, with ample headroom and legroom for everyone. Seats are firm and supportive, with separate heat-level controls for rear passengers.

Ventilated and heated front seats

Enjoy a more comfortable ride no matter what the weather is like outside. Control the front-seat ventilation fans and heat levels from the climate panel.

Integrated Memory System (IMS)

Driver seat settings can be stored to conveniently adjust seat positions when switching drivers.

Simple connectedness.

This is a human approach to technology. The cluster makes important data easy to understand. Controls are laid out for maximum efficiency. The driver is comfortably in command.

8-inch HUD

The head-up display projects an image equivalent to an 8-inch screen onto the windshield. Your eyes stay on the road as you monitor speed, remaining distance to empty, cruise control, and DRIVE WiSE technology data.

Panoramic curved display

A gently curved instrument display sets a 4-inch platform cluster at the center, while to the side, a tasteful 8-inch audio display keeps entertainment data well organized and in clear view.

Full auto temperature control (FATC)

FATC lets you set a desired temperature for a comfortable ride in any weather condition.

Wireless charging tray

The charging pad in the dash, in front of the center console, lets you quickly charge compatible mobile phones, wirelessly.

Ambient light

Mood lighting on the door speakers and crash pad garnish changes in brightness in synchrony with the audio system sound.

Demonstrating how technology is there help people, the new Seltos gives the driver and passengers the tools they need to stay relaxed and carry cargo with ease.

Power tailgate

The power tailgate can open and close automatically. The electro-mechanical system works with a wireless remote key fob or by hand, using the outside handle or a touch-button switch just inside the tailgate.

Rear Occupant Alert (ROA)

To make sure no one is left alone, ROA warns you of any rear occupants when you stop and prepare to exit.

Electronic Parking Brake (EPB)

Press the EPB button on the console when parking. EPB disengages when you press the accelerator while in Drive or Reverse.

Sunroof

Open the sunroof to give everyone a view of the sky and the refreshment that only fresh breezes can deliver. The sturdy single panel tilts and slides out of the way with one simple touch.

Responsive. Smooth. Efficient.

A precise combination of qualities is essential to smooth performance. The new Seltos gives you a precise balance of power and braking. It's responsive and quick, and the ride is quiet. So you can drive with confidence and peace of mind, no matter what surface you're on.

Smartstream G2.0

Max. power 149 ps

Max. torque 18.3 kg·m

Driving technology that protects.

Sharing the road safely means driving in sync with other drivers, and staying in control of your speed. The new Seltos gives you real advantages. Kia's DRIVE WiSE applies the latest Advanced Driver Assistance System (ADAS) technologies to help keep you aware and in control.

Blind-Spot Collision-Avoidance Assist (BCA)

When operating the turn signal switch to change lanes, BCA provides a warning if there is a risk of collision with a rear-side vehicle. If there is a risk of collision with a rear side vehicle when exiting a parallel parking spot, it automatically assists with emergency braking.

Cruise Control (CC)

Maintain a preset speed without having to step on the accelerator pedal to help reduce driver fatigue.

Manual Speed Limit Assist (MSLA)

If you drive over the preset speed limit, the warning function operates until the vehicle speed returns to within the speed limit.

ADAS technology is always looking out for you.

It can help you get into and out of tight spaces with confidence.
You can see behind you, not only when parking, but also as you drive.
ADAS will even warn you if you are about to back out into cross traffic.

Rear Cross-Traffic Collision-Avoidance Assist (RCCA)

If there is a risk of collision with an oncoming vehicle on the left or right side while reversing, RCCA provides a warning. After the warning, if the risk of collision increases, it automatically assists with emergency braking.

Rear View Monitor (RVM)

The Rear View Monitor displays video of the situation behind the vehicle for safe parking.

Forward/Reverse Parking Collision-Avoidance Assist (PDW)

To help you park safely and confidently, PDW uses ultrasonic sensors mounted on the front and rear bumpers to warn of any obstacles, helping you to position the wheels properly when maneuvering into tight spaces.

Choose your style.

From bold exterior lighting to helpful interior appointments, there are many ways to make the new Seltos your very own.
