EV6 GT

Exterior

From the eye-catching design to the awesome 650 Horsepower*

The GT takes the EV6 innovations to new levels of performance and driving pleasure.

GT 4WD _ Wolf Gray / Specifications may vary according to the trim and options that are selected.

0-100 kph in 3.5 seconds*
The EV6 GT accelerates from 0 to 100 kph in just 3.5 seconds! Boasting 650 horsepower* and a top speed of 260 kph, the EV6 GT promises an exhilarating driving experience every time you take the wheel.

Launch Control
Launch Control optimizes maximum acceleration from a standstill, allowing drivers to fully experience the thrill of a high-performance electric vehicle.

Virtual Gear Shift (VGS)
VGS enhances the driving experience with dynamic, virtual engine and gear-shifting sounds, adding an engaging auditory dimension.

Electronic Limited Slip Differential (e-LSD) & Electrically Controlled Suspension
The e-LSD dynamically manages traction between the left and right wheels, enhancing handling and reducing traction loss during high-speed turns. Furthermore, the electrically controlled suspension ensures exceptional ride comfort and precise handling for a superior driving experience.

※ High-performance brakes on the EV6 GT may naturally produce some noise and dust due to their design and functionality, which are normal characteristics of this advanced braking system.

Mono-Block Front Brakes & Large-Capacity Disc Brakes
Equipped with larger front and rear disc brakes compared to previous models and mono-block front brakes, the EV6 GT ensures braking power that matches its outstanding performance.

*Performance achieved using Launch Control

Interior

The EV6 GT's interior is designed to excite, featuring figure-hugging suede bucket seats, a circuit-inspired steering wheel, and sporty details that create a truly unique driving experience.

Neon Interior / Specifications may vary according to the trim and options that are selected.

Power-Adjustable Front Seats

First-row seats are electronically adjustable using a seat adjustment switch on the door-side lower seat area.

Driver Position Memory System (Including Driver's Seat Easy Access)

The driver position memory system remembers the preferred position of outside mirrors and driver's seat for each user. The steering wheel and seat automatically adjust for comfortable entry and exit.

Steering Wheel Grip Detection

The capacitive touch sensor on the steering wheel detects the driver's hands through electrical signals, ensuring better comfort and safety by confirming the driver is holding the wheel.

Steering Wheel Vibration Warning

When a collision risk is detected from the front or rear sides (blind spots) while driving, or when driver attention warning is required, the system alerts the driver through steering wheel vibrations to help ensure safer driving.

21" Machined Face Wheels, Neon Brake Calipers

21" wheels with a dynamic design, performance summer tires, and neon calipers accentuate the EV6 GT's high-performance visuals.

GT Mode

Automated adjustments to vehicle settings, including front and rear motor performance, ensure thrilling acceleration and an exhilarating driving experience.

Interior Colors

※ Geonic 3D pattern highlights the center console armrest and top of the crash pad.
