The new Niro

The new Niro

The new Niro: A masterpiece of best-in-class fuel efficiency, generous space, and futuristic design. Experience a smart and sensible mobility lifestyle tailored for those who value making their own choices.

The Smarter Choice Upon Comparison

The new Niro

Optimal Practicality

- Best-in-class Fuel Efficiency of 20.2 km/ℓ
- Generous Space
- 2nd-row Legroom and Headroom

Modern and Sophisticated Aesthetics

- Sculptural Front and Rear Bumpers
- Vertical Star-map Signature Lighting
- Sophisticated Two-tone Interior

Smart Urban Living

- Kia AI Assistant
- Front-row Relaxation Comfort Seat / 2nd Row Reclining Seat
- Highway Driving Assist 2 / Steering Wheel Grip Detection

Exterior

A refined, minimalist aesthetic combined with bold volumes and a sculptural front bumper and grille complete Niro's unique personality and solid presence.

Interior

The slim dashboard, centered around the Panoramic Curved Display, creates an expansive sense of openness, while the Two-tone Interior and Two-tone Steering Wheel offer a sophisticated and premium feel.

Ambient Light

Electronic Shift Dial

High-tech

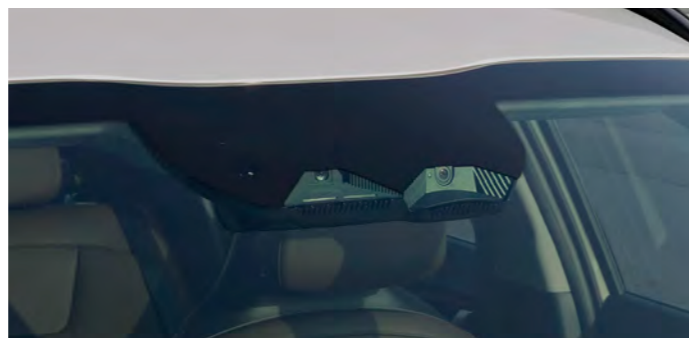

Experience a new level of convenience with advanced features like Kia Digital Key 2 for smartphone control, Built-in Cam 2 Plus, and Steering Wheel Grip Detection.

Kia Digital Key 2

Users can lock/unlock doors and start the vehicle using an iPhone, Apple Watch or Android smartphone without a smart key. Access can be shared with up to 15 devices.

- ※ Refer to the official Kia Connect website for supported devices.
- ※ Currently, this feature is only available with the Apple Watch.

Built-in Cam 2 Plus

The recording function initiates when motion is detected, for extended parking footage.

Notification and footage of parking impacts are sent to the Kia App, and you can check the built-in cam status information via the app.

- ※ Recording: Up to 4 days (Motion Detection Mode) / Up to 20 hours (Normal Mode)

Head-Up Display

Projects various driving information onto the windshield glass, minimizing driver eye movement and assisting in safe driving.

Kia AI Assistant

The Kia AI Assistant provides a convenient and smart vehicle experience.

Surround View Monitor

Provides a video display of the vehicle's surroundings to assist with safe parking.

Steering Wheel Grip Detection

Sensors that detect the electrical characteristics when the driver grips the steering wheel are applied, enabling a more comfortable driving experience.

Convenience

Generous second-row legroom and headroom add spaciousness and comfort to the time spent in the vehicle, while first-row Relaxation Comfort Seats and second-row reclining seats provide ultimate relaxation.

01. 2nd Row Reclining Seats

The reclining rear seats allow for various backrest angles, ensuring a more comfortable seating position.

02. 220V Inverter

An inverter located at the rear of the center console allows you to power small IT devices and low-capacity electronics directly via a 220 V outlet inside vehicle.

First-row Relaxation Comfort Seat

Relaxation Comfort Seats for the driver and front passenger enhance comfort and reduce fatigue by supporting an optimal posture for restful breaks.

100W USB-C Port / First-row Seatback USB-C Port

The high-performance 100W USB-C port ensures compatibility with the latest devices and provides fast, convenient charging. USB-C ports on the back of the first-row seats allow second-row passengers to charge their devices with ease.

Smart Power Tailgate

When approaching the rear of the vehicle with the smart key, the tailgate opens automatically after a short delay, enabling convenient loading of items.

Walk Away Lock

After turning off the ignition and moving a certain distance away from the vehicle with the smart key, the door lock function activates automatically.

Safety

Advanced Driver Assistance Systems (ADAS), including Highway Driving Assist 2 and Navigation-based Smart Cruise Control, ensure your safety and convenience across various driving and parking scenarios.

Highway Driving Assist 2 (including Lane Change Assist)

Maintains a safe distance from the vehicle in front on motorways and highways, and maintains the speed set by the driver while keeping the car in the center of the lane, even on curved roads. It moves the vehicle to the other side of the lane if it gets too close to the vehicle in the next lane. When driving above a certain speed, hold the steering wheel and activate the turn signal in the direction of the desired lane to initiate an automatic lane change.

10 Airbags*

Designed to protect passengers during a collision, the system now includes 2nd-row seat side airbags to ensure even greater safety for all occupants.

Navigation-based Smart Cruise Control

When driving on motorways and highways, it helps you maintain a safe speed in line with the traffic. It automatically reduces the vehicle's speed before entering safe speed zones, curved sections, or ramps, and then resumes the originally set speed after passing these sections.

Forward Collision Avoidance Assist

By detecting the risk of collision with a vehicle, motorcycle, pedestrian, or cyclist ahead, it provides a warning and assists with braking to reduce or avoid an impact. The system assists with braking if a collision risk is detected with oncoming vehicles during left or right turns at an intersection, with oncoming vehicles while driving, or with vehicles approaching from the left or right when proceeding straight through an intersection. When changing lanes, the system detects the risk of collision with oncoming vehicles or vehicles in the adjacent lane, or with vehicles or pedestrians on the edge of the forward lane while driving, and assists with steering.

Lane Keeping Assist 2

It helps maintain the vehicle in the center of the lane. By evolving from 'torque control' to 'steering angle control,' this enhanced Lane Following Assist provides superior performance compared to the first generation.

Side Parking Distance Warning / Rear Parking Collision-Avoidance Assist

Detects obstacles on both sides while parking and provides warnings for objects located to the side when moving forward or reversing. Provides a warning and assists with automatic braking if a risk of collision with a rear object is detected while reversing.

Remote Smart Parking Assist

Allows you to control the vehicle's forward and backward movement from outside the vehicle. Remotely park or exit a parking space using either the smart key or your smartphone. ※ Also available via Digital Key 2 on smartphones (iPhone and Android) without the need for a physical smart key.
