The Kia PV5

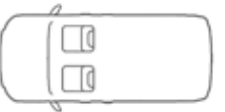

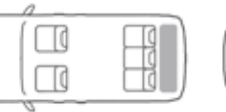

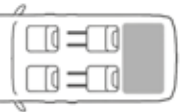

Movement that inspires

The ultimate in space and convenience.
Free up and expand your life, dream and business
One Space, Infinite Possibilities

Play your Vision
The Kia PV5

The Kia PV5 Passenger Lineup
It provides innovative smart mobility by tailoring the number of seats in the first, second, and third rows to diverse customer lifestyles.

					
Passenger (2-3-0)	Passenger Donor Model	Passenger (1-2-2)	Passenger (2-2-3)	WAV	Prime
Same seating configuration as a conventional passenger vehicle, while providing ample cargo space	Removing the second-row seats, floor, and luggage trim reduces removal and disposal labor and costs during special vehicle conversions	System configured to allow cargo loading in the front passenger area	3-row multi-passenger seating arrangement for up to 7 passengers	Secures wheelchair space by omitting the 2nd-row seats	Provides exceptional 2nd-row convenience with 2nd-row Premium Relaxation Seats

Passenger(2-3-0) _ Soft Mint
WAV _ Steel Gray
Passenger(1-2-2) _ Clear White
Prime _ Moonscape Matte Gray

Specifications may vary according to the trim and options that are selected.

Passenger(2-3-0)

With ample cargo space and an excellent interior layout, experience a space optimized for everything from business to daily life.

Max. range per charge	Battery	Max. power	Max. torque	Charging Time
358 km	71.2 kWh	120 kW	250 Nm	30 min

Based on 2WD, 16" tires

Passenger(2-3-0) _ Soft Mint / Specifications may vary according to the trim and options that are selected.

※ Battery charging times are based on internal laboratory tests.
※ Actual charging time may increase due to a decline in the battery's performance when outdoor temperatures drop, such as in the winter.
※ Charging times were measured when the battery and exterior were at room temperature. Actual figures may vary depending on the battery temperature, power of the charger, battery condition, and external temperature.

Interior

Second row fold & dive seats (reclining)
※ Image of luggage flat-deck in use

Luggage tray

Passenger Donor Model (2-3-0 Base)

The Passenger Donor Model is an incomplete vehicle designed to maximize customization. By omitting the second-row seats and speaker system, the entire second and third rows can be utilized as a specialized conversion space. This minimizes resource waste from removal and disposal while providing an eco-friendly base vehicle adaptable to a wide range of purpose.

Passenger(1-2-2)

With the spacious interior and generous storage provided by the 1-2-2 seating configuration, it offers a new mobility experience for both passengers and the driver.

Max. range per charge	Battery	Max. power	Max. torque	Charging Time
358 km	71.2 kWh	120 kW	250 Nm	30 min
Based on 2WD, 16" tires		350 kW fast charger, charged to 80%		

※ Battery charging times are based on internal laboratory tests.
※ Actual charging time may increase due to a decline in the battery's performance when outdoor temperatures drop, such as in the winter.
※ Charging times were measured when the battery and exterior were at room temperature. Actual figures may vary depending on the battery temperature, power of the charger, battery condition, and external temperature.

Passenger(1-2-2) _ Clear White / Specifications may vary according to the trim and options that are selected.

Mobility Life

Flexible use for any situations, from daily life to business.

Passenger(2-3-0)

Events & Photoshoots - Handy external V2L power and generous cargo space provide support at event and photoshoot sites.

Laundry Service - Large cargo space enables more hygienic and efficient deliveries.

Prime

School Runs - From school runs to weekend picnics, it provides comfortable travel with a spacious interior and individual seats.

Leisure Activities - Experience the joy of travel in a spacious interior, even when loaded with various leisure gear.

Passenger(2-2-3 / 1-2-2)

Large Families - Experience a pleasant and comfortable space tailored for large families.

Airport Transfer Taxi - Utilizing the 1st-row passenger seat as cargo space allows for more convenient boarding and exiting.

Specifications may vary according to the trim and options that are selected.

Technology

Experience the ease and convenience of PV5's advanced technology.

12.9-inch infotainment system dedicated to PBV

16:9 UX improves mobility connectivity and accessibility. Display-integrated air-conditioning control feature enhances visibility.

Walk Away Lock

When you park the vehicle and move away a certain distance, the vehicle doors automatically lock.

i-PEDAL 3.0/Steering Wheel Grip Detection

At all stages of regenerative braking, the accelerator pedal can be used to adjust the car's speed or stop it. A memory function is available for reverse parking and restarting.

※ Switch the reverse parking function on/off in the system settings menu.

A capacitive sensor is applied to detect the electrical characteristics when the driver holds the steering wheel, determining the grip status and providing a more comfortable driving experience.

Rear View Monitor

Provides a clear view of the rear for the driver even under poor visibility by projecting live video through the large-screen display. Can be used simultaneously with the navigation system while driving.

Exterior V2L Connector

Connect your electronic devices to the exterior V2L connector for convenient outdoor operation.

Interior V2L Outlet

You can conveniently use various electronic devices inside the vehicle by connecting to the 220V power supply via outlets located in areas such as the center console.

Safety

Kia's advanced driver assistance systems ensure safety and convenience in a variety of driving and parking situations.

Highway Driving Assist / Lane Keeping Assist 2

When driving on highways or motorways, the system helps maintain a safe distance from the vehicle ahead while keeping the vehicle centered in the lane at the driver's set speed.

Car stays centered in the lane using a steering angle control system, marking an improvement over the first-generation torque control system.

Acceleration Limit Assist

While driving (under 80 km/h), if the driver depresses the accelerator pedal deeply for an extended period, the system warns the driver and then limits acceleration. Acceleration is permitted again if the brake pedal is depressed, or 1 second after completely releasing the accelerator pedal.

Navigation-based Smart Cruise Control

When driving on motorways and highways, it helps you maintain a safe speed in line with the traffic. It automatically reduces the speed of the vehicle in a safe speed zone and on curved roads, then returns to the set speed under normal conditions.

Forward Collision-Avoidance Assist (Vehicle/Pedestrian/Cyclist/Junction Turning/Direct Oncoming)

The system warns the driver when the preceding vehicle brakes abruptly or when a stopped vehicle, pedestrian or bicycle is in front of the vehicle. When the risk of a collision remains high after the warning, the car will automatically apply braking assistance. Braking assistance is also applied to prevent collisions with oncoming vehicles during left turns.

Blind-spot Collision-avoidance Assist (Parallel Exit)

When exiting a parallel parking space, automated braking assistance avoids collisions with passing vehicles. The system produces a flashing display on the mirror and an audio alarm is activated when the system detects a vehicle approaching on the side when the turn signal is activated for a lane change.

Rear Parking Collision-Avoidance Assist

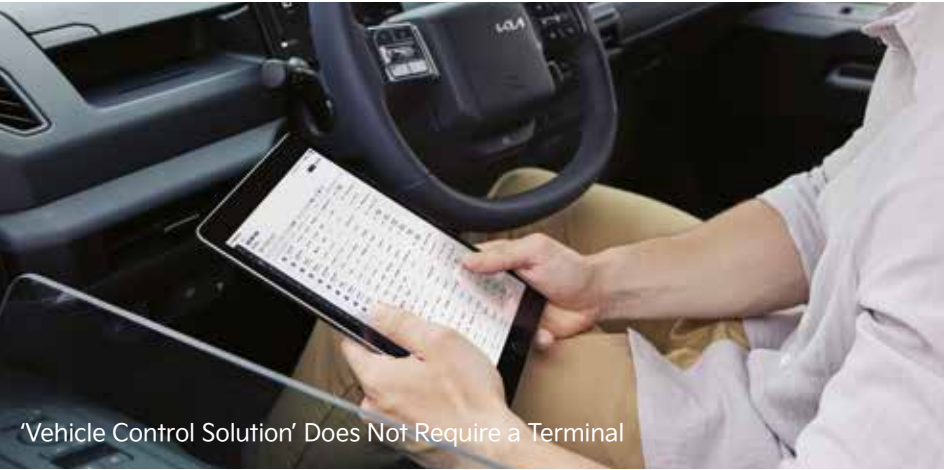

Drivers are warned of an object behind when backing up. If the risk of a collision remains high after the warning, braking assistance is automatically applied.

※ ADAS is only intended to assist the driver. Be attentive while driving at all times. / Functions may not operate smoothly due to road or driving conditions. / Please refer to the user's manual for details.

Specifications may vary according to the trim and options that are selected.

PV5 Experience

Meet tomorrow's mobility technology in the PV5.
