Performance that dominates the road

When Kia came in first in the 2014 Pirelli World Challenge GTS-Class Manufacturer Championship with two competition GTS-class turbocharged Optimas, racing enthusiasts were impressed that Kia bested Porsche and Aston Martin by tallying more points to claim the championship. While those two retrofitted racing machines were designed for the track, the 2016 Optima joins them as a vehicle engineered to transform your everyday drive. Along with truly exhilarating performance, Optima features a chassis that is long, wide, light, and stiff, helping to provide a smooth ride with quick responsiveness.

EXCEPTIONAL PERFORMANCE

A 2.4L Gasoline Direct Injection (GDI) engine, and the available turbocharged 1.6L and 2.0L GDI engines,* all deliver inspiring performance and an ideal balance of strong acceleration and efficiency. Continuously Variable Valve Timing (CVVT) further enhances performance while reducing exhaust emissions.

7-SPEED DUAL-CLUTCH TRANSMISSION*

The available 1.6-liter turbocharged GDI engine* is paired with a 7-speed dual-clutch transmission (DCT) that optimizes the engine’s responsiveness for a sporty feel. The DCT system instantly engages and disengages gears, improving efficiency and acceleration.

SPORTMATE® TRANSMISSION

A 6-speed Sportmatic® transmission allows you to choose automatic mode or, for a sportier driving experience, clutch-free manual shifting. It includes preset shift patterns for specific conditions like uphill, inclement weather, or performance driving.

SMOOTH, PRECISE HANDLING

A refined four-wheel independent suspension features high-performance dampers, front MacPherson struts, and a rear multi-link design for a smooth ride and precise handling. Optima SX features a sport-tuned suspension for even greater responsiveness.

A REMARKABLY QUIET RIDE

Optima is carefully engineered to reward you with a super quiet ride. Sleek exterior aerodynamics reduce wind noise, while a full-cover underbody directs air flow. Plus, sound-absorbing insulation throughout the vehicle further helps reduce, block, and absorb unwanted sound.

DRIVE MODE SELECT SYSTEM

To suit your style of driving, available Drive Mode selectable electronic steering and powertrain control allows a choice of NORMAL, ECO, or SPORT settings.

Intuitive safety technology

Optima’s technologically advanced systems are engineered to give you greater confidence on the road and help you maintain control, even in harsh road conditions and some emergency situations.† In addition, these systems are designed to function automatically, freeing you to focus on safe driving.

VEHICLE STABILITY MANAGEMENT (VSM)
For additional steering-direction-control capability, the VSM system intervenes in appropriate situations to help the driver regain control of the vehicle.

ELECTRONIC STABILITY CONTROL (ESC)
ESC provides improved directional stability to help maintain better control in difficult driving situations. During emergency maneuvers, it works to control the engine and brakes to help keep your Optima on course.

TRACTION CONTROL SYSTEM (TCS)
When TCS senses wheelspin during acceleration, it uses a combination of both engine power and brake force to help transfer power to the wheels that have the most traction.

ELECTRONIC BRAKE-FORCE DISTRIBUTION (EBD)
To help maintain more consistent braking as vehicle loads and weight distribution change, EBD automatically adjusts the front-to-rear balance of brake pressure.

TRACTION CONTROL SYSTEM (TCS)
When TCS senses wheelspin during acceleration, it uses a combination of both engine power and brake force to help transfer power to the wheels that have the most traction.

HILL-START ASSIST CONTROL (HAC)
To help keep your Optima from rolling backward when starting off on a steep hill, the HAC system automatically holds the brake pressure for two seconds after you take your foot off the brake pedal.

†No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive responsibly. SX LIMITED SHOWN.
ISO-STRUCTURE™ CONSTRUCTION
The Optima features a uniquely engineered body that combines various high-tensile strength steel alloys. This body structure helps provide crash protection, improved driving dynamics, and is the foundation for a quiet ride overall.

SIDE-IMPACT DOOR BEAMS
All doors are reinforced with steel beams to help absorb impact energy and deflect side-impact force. In addition, the body’s support pillars are also reinforced to help strengthen the body of the vehicle.

FRONT & REAR CRUMPLE ZONES
Both front and rear crumple zones are specially engineered to help absorb and disperse impact energy, helping to preserve the basic structural integrity of the passenger compartment in certain collisions.

ADVANCED AIRBAG SYSTEM
An advanced airbag system helps protect driver and passengers with dual front, front seat-mounted side, and full-length side curtain airbags and is complemented by a driver’s knee airbag.15

AIRBAG & SEAT-BELT SENSORS
This advanced system monitors the severity of certain impacts, the presence of a front passenger and seat-belt use, and then controls airbag inflation accordingly,15 helping to ensure your peace of mind.

FRONT SEAT-BELT PRETENSIONERS
Pretensioners have been designed to tighten the front seat belts in the event of certain collisions. This helps to reduce the likelihood of injuries in some situations.

HEIGHT-ADJUSTABLE SEAT-BELT ANCHORS
The front height-adjustable seat-belt anchors allow the driver and front-passenger seat belts to be raised and lowered for a proper fit.

FRONT & REAR 3-POINT SEAT BELTS
Three-point seat belts are standard for all seating positions, so that each person is protected with an over-the-lap and shoulder seat belt.

LATCH SYSTEM
Easy-to-use Lower Anchors and Tethers for Children (LATCH) system is engineered to let you securely install a compatible child seat at either end of the rear seat.

Advanced engineering for your protection
At Kia, the process of improving all aspects of safety is relentless. Year after year, engineering advances and breakthroughs in material design lead Kia’s engineers to produce vehicles with more strategically placed airbags, measurably stronger body construction, and advanced sensors, all to increase your peace of mind.
